Personal Info

Experience : 1 Year

Immediate joining

ISC2 CC & CCNA Certified & CEH inprogress

Veltech University 2024 Passed-out(7.6 CGPA)

Entry-Level SOC analyst with hands-on SIEM Monitoring and Incident response exposure from TryHackMe SOC path.

Skills

Technical Skills :

- > Tools & Security Testing: Burp Suite, Kali Linux, scripting (Python), wireshark, Nmap..
- > SIEM & Incident Response: Splunk, QRadar, Palo Alto Cortex, Alert Triage, SOAR
- > Networking: TCP/IP, VLANs, routing(ospf, BGP, EIGRP), NAT.
- > Security: PfSense firewall, ACLs, IDS/IPS Basics, Threat Intelligence feeds
- > Log Analysis: Event viewer, linux syslog, log ingestion, monitoring and error Troubleshooting.

Experience

L&T Shipbuilding

Jan 2025 – Till Now

NETWORK SUPPORT ENGINEER

- > **Network & Telephony management:** Managed complete Alcatel telephone infrastructure and company-wide network systems.
- > **Access Point Configuration:** Configured cisco and aruba access Points; Performed vulnerability checks on new cisco and Extreme switches.
- > **EndPoint Security:** Administered Trellix Drive Encryption(TDE) for user drive protection.
- > **Surveillance Systems:** Oversaw 95 security cameras across premises, ensuring operational integrity.
- > **Patch Management:** Conducted monthly software Patch updates for all network devices to mitigate known vulnerabilities.
- > **Attendance System Administration:** Managed Matrix COSEC punching devices for contractor attendance; pulled monthly attendance data from server and shared with supervisors.

PROJECTS

Enterprise Level Threat Detection & Response Lab

properly mentioned on github.

- > **Virtual Setup:** Built a virtual enterprise SOC environment with windows server, linux servers, pfsense firewall and endpoints.
- > **SIEM:** Deployed Wazuh SIEM to collect logs from firewalls, endpoints, servers and Network Devices.
- > Simulated adversary techniques using ATOMIC RED/ Caldera, including phishing, brute-force and lateral movement.
- > Engineered custom detection rules for failed logins, suspicious Powershell, firewall changes and VPN misuse.
- > Documented incident response playbooks and conducted proactive threat hunts for persistence, anomalous traffic and privilege escalation.
